

From the name 'Another5_Mrd1', now it's my turn as Septian_MR to carry on this amazing legacy!

It's a new little add-on map mod that contains an extensive rework of the West Balkans DLC map for Euro Truck Simulator 2 (ETS2). It's designed for players seeking to explore new realistic routes through the map.

List of map contents since the initial release (September 2024) until now:

a) Croatia

- A new explored city: Slavonski Brod.
- Reworked A3(E70) highway section across Slavonski Brod.
- Added 53 road section from Slavonski Brod to Bosnia border crossing.

b) Bosnia & Herzegovina:

- A new explored city: Doboј.
- Several new scenery towns: (Bosanski) Brod, Matuzići (south Doboј).
- Reworked the entire "9 Januar" motorway from Doboј to Banja Luka.
- New M17 and M14.1 road section from Doboј, Kladari (motorway exit), and directly to (Bosanski) Brod.
- Reworked the Liješnica big paper factory (SCS_Paper) and surrounding.
- New M4 road section from Matuzići directly to Banja Luka, including the scenic mountainous area.

Requirements:

- ETS2 1.53 (and above).
- Only a map DLC: West Balkans (nothing else).

(For example: if you have 'West Balkans DLC' but don't have 'Iberia DLC', you can still play this map. Of course, you can play this map with all full DLCs. Compatible with Greece DLC too).

Map installation:

- It's the same way as other map mod's installations. Put a "wbpd_addon_map_main.scs" file into mod folder.
- To include with map combo, place this map somewhere on top of all other (addon) map mods in Mod Manager menu.

Notes:

This WBPD map is (or should be) compatible with the map combo. But let me know if there are other map mods that were incompatible with this map. And feel free to create a new road connection mod if necessary.
